

Wheelchair Front Anti-Tippers

The DME Care Solutions Wheelchair Front Anti-Tipper is a sturdy steel accessory designed to help reduce the risk of forward tipping, particularly during abrupt stops or braking. The anti-tipper attaches easily to most manual wheelchairs, offering added stability and security for users. Ideal for use in hospitals, long-term care facilities, and homecare environments.

- Durable steel construction offers long-lasting stability
- Helps reduce the risk of tipping forward during use or sudden braking
- Easily attaches to most manual wheelchairs
- Ideal for long-term care, hospital, and home care settings
