

CLOSED SUCTION CATHETERS TRACHEAL

LENGTH: 30.5 CM/12 IN

Resp-O2 Closed Suction Trach Catheters are disposable respiratory devices designed to remove airway secretions from ventilator-dependent patients without interrupting ventilation. The closed system helps protect patients and caregivers from airborne pathogens during suctioning.

- Closed design helps protect patients from airborne pathogens and cross-contamination
- Designed to remove airway secretions while maintaining ventilation
- Smooth, flexible tubing minimizes patient discomfort during suctioning
- Pressure wiper seal helps maintain positive end-expiratory pressure (PEEP)
- Flex Tube provides adjustment and flexibility to the ventilator circuit
- Intended for 24-hour, single-patient use
- Not made with DEHP
