Please retain instructions for future reference.

Care and use

To ensure safe operation and longevity of the airer, please follow these essential care and use guidelines. When collapsing the airer, grasp the top securely and unclip one side before proceeding to unclipping the other side while maintaining your hold on the top. Gently push the airer down to the ground. It is crucial to avoid moving the airer once it is laden, as this can lead to damage. Additionally, do not drag the airer, as this places unnecessary strain on its legs. Always load the airer evenly, beginning with the lower bars, and take care to avoid overloading it. Weight should be distributed evenly across the airer, and for optimal use, it is recommended to use the airer indoors only.

Made in **China**.
