EMERSON

SUPPORTING EVERY PHASE OF DATA CENTER CONSTRUCTION & OPERATIONS

Data centers are among the most complex and demanding construction projects in the world. From site preparation and facility construction to power installation, thermal management, system deployment, and long-term maintenance, every phase depends on reliable tools and the professionals who use them.

RIDGID® and Greenlee® tools support the utility, commercial electrical, and mechanical contractors responsible for installing and maintaining the critical systems that keep data centers running.

BUILT FOR THE WAY CONTRACTORS WORK TODAY

Data center timelines are tightening, and speed matters. Today's jobs demand tools that integrate seamlessly into prefabrication and modular workflows.

RIDGID and Greenlee help teams move faster, work more consistently, and deliver with confidence in any environment, from prefab through final install and ongoing maintenance. Faster maintenance and repair help minimize downtime.

Backed by service and field support, you can keep critical systems up and running without interruption.

Proven Lug Compatibility to Meet Industry Specifications

Greenlee connections are UL and cUL classified for copper and aluminium when used with Anderson®, Blackburn®, ILSCO®, Panduit®, Thomas & Bett® and Penn-Union® color-coded lugs and splices.

TRUSTED BY THE PROFESSIONALS

RIDGID and Greenlee are the anchors of Emerson's Professional Tools portfolio, supporting professionals across critical infrastructure industries including utilities, energy, telecommunications, and large-scale construction. Together, our brands help the trades build and maintain the infrastructure that powers modern data centers.

INFRASTRUCTURE LIFECYCLE

FROM CONSTRUCTION THROUGH LONG-TERM OPERATIONS

1

SITE & CORE CONSTRUCTION

Building the physical foundation of the facility

Typical Work:

- ▶ Underground utilities and water infrastructure installation
- ▶ Structural facility construction
- ▶ Mechanical room and cooling plant construction
- ▶ Drainage systems and stormwater installation

What Our Tools Support:

- ▶ Large-diameter pipe preparation and joining
- ▶ Conduit preparation and duct bank assembly
- ▶ Mechanical and utility piping installation
- ▶ Site layout and underground utility locating

2

POWER & INFRASTRUCTURE INSTALLATION

Installing the facility's electrical and mechanical backbone

Typical Work:

- ▶ Medium-voltage service entrance and distribution
- ▶ Switchgear and distribution equipment installation
- ▶ Electrical feeder and branch installation
- ▶ Cooling system piping and mechanical infrastructure

What Our Tools Support:

- ▶ Conduit bending and wire pulling
- ▶ Precision hole making
- ▶ Battery-powered wire cutters and crimpers
- ▶ Reliable pipe prep and mechanical system installation

3

INFRASTRUCTURE DEPLOYMENT

Bringing the facility online

Typical Work:

- ▶ Rack and row fit-out
- ▶ Cooling system startup and commissioning
- ▶ Cable termination and labeling
- ▶ System testing, commissioning, and performance validation

What Our Tools Support:

- ▶ Cooling system piping
- ▶ Cable preparation and installation
- ▶ Precision fabrication
- ▶ Inspection and testing support

4

OPERATIONS, MAINTENANCE & EXPANSION

Ensuring continuous uptime

Typical Work:

- ▶ Preventative maintenance programs
- ▶ System diagnostics and troubleshooting
- ▶ Cooling system and piping maintenance
- ▶ Cable repair and infrastructure upgrades
- ▶ Infrastructure expansion and system upgrades

What Our Tools Support:

- ▶ Diagnostics and inspection support
- ▶ Pipe maintenance and repair systems
- ▶ Test and measurement
- ▶ Electrical service and maintenance tools

SUPPORTING THE MEP PROFESSIONALS

Data center construction depends on coordination across multiple trades, contractors, and project teams. RIDGID and Greenlee tools are trusted by the mechanical, electrical, and plumbing professionals responsible for building, installing, and maintaining critical infrastructure.

FOR OWNERS AND DEVELOPERS RELIABLE PROJECTS. PROVEN TOOLS.

Data center operators demand reliability, schedule certainty, and long-term performance. They expect contractors to use proven, dependable tools that deliver consistent results in demanding environments.

RIDGID and Greenlee tools help support:

- ▶ Faster installation and fewer disruptions
- ▶ Reduced risk and more predictable outcomes
- ▶ Long-term tool system performance
- ▶ Dependable specification compliance

FOR PROJECT MANAGERS AND PROCUREMENT TOOLS THAT KEEP PROJECTS MOVING.

Large-scale construction projects require equipment that can keep pace with demanding schedules and multiple trades working simultaneously.

Our solutions support contractors with tools designed for:

- ▶ Proven durability on demanding jobsites
- ▶ Service and repair support when it matters
- ▶ Field support to keep projects moving
- ▶ Consistent, controlled execution across crews

FOR THE TRADES BUILT FOR PROFESSIONALS DOING THE WORK.

Electricians, mechanical contractors, and service professionals rely on their tools every day to build and maintain critical infrastructure. RIDGID and Greenlee tools are designed for performance, durability, and jobsite reliability.

Supporting professionals who install and maintain:

- ▶ Electrical power distribution
- ▶ Conduit and cable systems
- ▶ Mechanical piping and cooling systems
- ▶ Utility and infrastructure systems

BUILT FOR THE JOBSITE. BACKED FOR THE LONG RUN.

RIDGID and Greenlee tools are built for demanding work, but our commitment goes beyond the product. We support contractors, project teams, and maintenance professionals with the services, expertise, and training needed to keep projects moving and operations running smoothly.

INDUSTRY-LEADING WARRANTY

Our RIDGID products, Greenlee battery hydraulic tools, hand tools, and test and measurement products offer industry-leading warranties, providing confidence that your investment is protected and your teams can keep working without interruption.

TAILORED TRAINING SOLUTIONS

We offer professional training programs designed to help contractors and technicians get the most from their tools while improving jobsite safety and productivity.

Training options include:

- ▶ In-field and distributor-hosted product training
- ▶ Customized hands-on training tailored to your crew's needs

FIELD EXPERTS & JOBSITE SUPPORT

Our field specialists work directly with contractors and project teams to help optimize workflows, recommend the right solutions, and ensure teams are using the latest innovations to maximize productivity.

Support may include:

- ▶ Jobsite evaluations
- ▶ Workflow and tool optimization
- ▶ Application expertise
- ▶ Demonstrations of new technologies

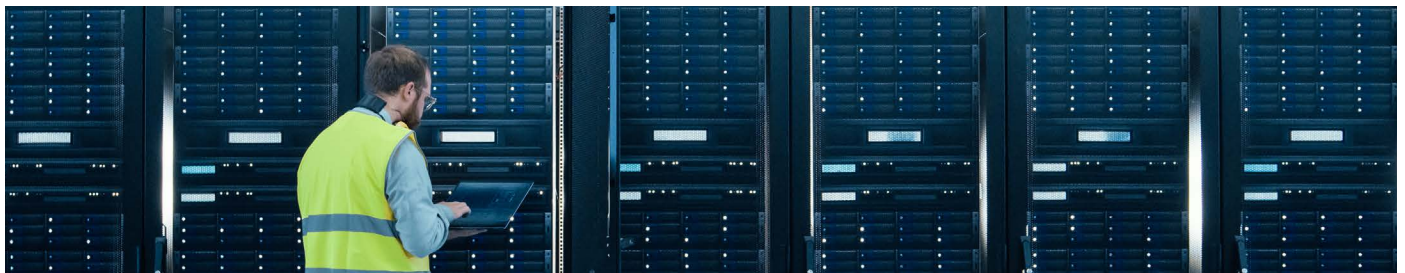

SERVICE & REPAIR WORK

Keeping tools operational is essential on fast-paced infrastructure projects. Our national network of authorized service centers provides fast, reliable repair and maintenance services to help minimize downtime and extend tool life.

Service support includes:

- ▶ Authorized repair centers nationwide
- ▶ Factory-trained technicians
- ▶ Genuine replacement parts
- ▶ Preventive maintenance support

PROFESSIONAL. NOTHING LESS.

For more than 160 years, Greenlee has set the standard for professional electrical tools. Proven on the most demanding jobsites, commercial, industrial, and utility applications, our tools deliver the performance and reliability professionals depend on.

Greenlee is dedicated to innovating and developing the next generation of solutions that elevate the trades and improve confidence, ergonomics, and precision for today's professional tradespeople.

ACCURATE, REPEATABLE, & QUALITY BENDING

Greenlee bending solutions are built for the precision and durability required across commercial, industrial, and utility environments. Whether forming simple offsets or complex conduit runs, our benders deliver accuracy, repeatability, and efficient performance across every jobsite.

Trust Greenlee as the industry standard for bending stubs, offsets, saddles, U-bends in EMT, and Rigid conduit.

881GX HYDRAULIC BENDER

2-1/2" TO 4" EMT, IMC & RIGID CONDUIT

Compatible with 881CT Series Hydraulic Benders

EASY & FAST SETUP

Eliminate loose parts and ram repositioning with spring pins and extended yoke

REDUCE STRAIN & FATIGUE

55% lighter follow bars enable easier setup

ANTI-THEFT STORAGE

Protect shoes and accessories with lockable storage

HANDS-FREE MEDIA

Easily access tablets, notebooks, and more

BENDING

CATEGORY STRENGTHS

► REPEATABLE BEND QUALITY

Consistent and repeatable results deliver quality across every run

► RUGGED FOR DAILY DEMANDS

Engineered to withstand high demand jobs

► HIGH CAPACITY & CONDUIT VERSATILITY

Products available for broad range of conduit types and sizes

► CONTROL EVERY DEGREE

Precision control for accurate angles

Simple: Ready to bend in 2 steps: orient shoes and select angle to bend

Reliable: Solid state electronics decreases downtime, rates for 1,000,000+ bends

Accurate: Absolute encoder stops bending at exact angles, no guesswork involved.
Digital pendant sets angle and monitors process

SECURE TRANSPORTATION

Raised fork pockets for better balance and dedicated strapping points for securing in trailer

ELECTRIC CONDUIT BENDER - 854DX

1 shoe bends ½" to 2" EMT, IMC and Rigid conduit

PROGRAMMABLE ELECTRIC CONDUIT BENDER - 855GX

1 shoe bends ¾" to 2" Rigid, 1" to 2" EMT/IMC

EFFICIENT, CONTROLLED PULLING

Greenlee cable pulling solutions are engineered to support demanding electrical environments from commercial to utility.

From short runs to long, complex pulls, our systems help crews work faster with consistent, repeatable results.

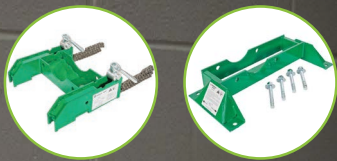

GX10 TUGGER™
10,000 LB. CABLE PULLER

QUICK-DISCONNECT SYSTEM
Allows for 360° of adjustments for the elbow and nose

EXTENDABLE BOOM
Boom can extend up to 20'

RIGHT-ANGLE SHEAVE
Keeps operators out of direct line of pulls

MULTI-PURPOSE FOOT SWITCH
Control speed and start/stop operation with foot switch

ADDITIONAL MOUNTING OPTIONS
Floor mount and chain mount are also available for the GX10

HAND CRANK

Provides assistance when lifting heavy loads with the boom

FORCE INDICATOR

Helps prevent damage to puller & cable

NEW SPECIALIZED DUAL-SPEED MOTOR

Allows for faster pulls up to 10,000 lbs to increase pulling productivity

PULLING

CATEGORY STRENGTHS

► INDUSTRY LEADING PULLING POWER

From 1k to 10k, we have a puller that will complete the job fast and efficiently

► ADAPT TO ANY JOBSITE

Versatile mounting solutions for every puller enables fast setup in different environments

► ENGINEERED FOR JOBSITE DURABILITY

Robust, custom designed motors and rugged construction deliver dependable performance crews need

**G1 VERSI-TUGGER™
HANDHELD PULLER**

Pull 68% faster than manual pulling

Unload Poly line in seconds after a pull

Adjustable boom: 17" rotatable boom quickly adjusts to fit each job with 3 length positions to choose from

* Drill not included

**G6 TURBO™
CABLE PULLER**

Setup in less than 60 seconds

Two speed motor specially designed for 6,000 pound pulls

Compatible with Pull Connect to provide communication and synchronization between the pulling and feeding locations

ROPES, GRIPS, AND TOOLS TO SUPPORT EVERY PULL

Maximize the performance on all cable pulls. From high-strength ropes to grips, swivels, and sheaves, Greenlee delivers smooth, protected cable movement across all types of conduit and tray installations.

PULLING ACCESSORIES

CATEGORY STRENGTHS

- **SMOOTHER, MORE EFFICIENT PULLS**
Guide cable through bends, corners, and conduit runs with less resistance
- **CABLE PROTECTION**
Sheaves, rollers, and guides reduce friction and prevent damage during tough pulls
- **SECURE PULLING CONNECTIONS**
Maintain total control with high-quality pulling grips and accessories
