

Identify the Hardware Revision for Assembly Instructions

1. Locate the **Lot Code Sticker** on the **Product** itself or the **Product Packaging**.
2. Identify the **Hardware Revision** by checking the **Fifth** and **Sixth** characters in the **Lot Code** by reading the characters from left to right.
3. For **Revision 04** and newer, please note that the **Monitor Stand Base** features a new design that can be screwed into a wooden desk or surface.

Note: *If the Lot Code Sticker is missing or cannot be found, visually inspect the Monitor Stand's Base for three Mounting Holes around the front of the Base. If found, this will indicate Revision 04 or newer.*

4. If you have **Revision 04** or newer, download the manual labeled **ARMDUOVS_QSG_R04**. Otherwise, download the **ARMDUOVS_QSG** manual.
