

1800W ADJUSTABLE TEMP. COMPACT HEAT GUN

ADJUSTMENT DIAL

Precise control and professional results

1800
WATT

COMPACT DESIGN

20% Smaller than traditional heat guns

CERAMIC HEAT ELEMENTS

Provides consistent temperatures and extended service life

2 SPEED SWITCH

Delivers 10.6/ 17.7 CFM (300/ 500L/ min.) air flow

THERMAL RELAY

Prevents overheating and assures safe operation

NOZZLE ADAPTERS

Air spreader, reducer, scraper and deflector

POWER CORD

UL Listed polarized 2-prong plug

Item #	Inner	Master	UPC	Packaging
W7735	1	20	039564157998	Brown/White Box

- 1800W Heat gun with temperature adjustment dial, varies the heat output between 122 - 662° F or 122 - 1202° F (50-350° C or 50-650° C), ensuring precise control and professional results
- 2-Speed air flow settings of 10.6 and 17.7 CFM (300-500L/ min.) provide versatility for different applications
- Double wire heating coils wrapped around ceramic elements and a mica insulative sleeve provide consistent heat, extended run times, and fast heat up in under 2 seconds

- New compact design is 20% smaller than traditional heat guns, allowing use in tighter spaces and easier to fit into tool bags on the go
- 100% Copper motor windings provide higher efficiency, low noise. and a longer service life
- Integrated thermal relay prevents overheating or damaging motor, and assures safe operation
- Kit includes 4 different nozzle adapters, air spreader, reducer, scraper, and deflector for controlling the flow of air and focusing heat to the desired area
