You will need to make sure that your assembly is square before tightening your bolts.

When you see this icon you will need a socket wrench. The icons below show the size of attachments needed for assembly 1/2.

For proper assembly you will need to ensure that your structure is level before proceeding to the next step.

This icon warns you to not over tighten your bolts. This is to prevent structural damage and also splintering your wood.

Some steps in the assembly process will require an extra set of hands. Make sure you have a helper available.

This icon shows the size of an open ended wrench. Using the wrench as the fraction bar.

This icon will show you what drill attachments are needed. For this example you will need a Phillips head attachment and 3/8 socket.
