

SONANCE

SMALL APERTURE SERIES

SA4-66

SOLD AS EACH

Sonance Small Aperture is equipped to perform with great range and depth that is unexpected from a 4" speaker opening. With a 6.5" woofer, a 2" aluminum wide-band module, all packaged into a rigid wood enclosure. The SA4-66 Sonance Small Aperture model is the new addition to the awarded and celebrated James Small Aperture Series, at an entry price point. The series offers more robust performance and modifications in the upgraded James models. See James SA68 for the performance step up.

SMALL APERTURE MODULE

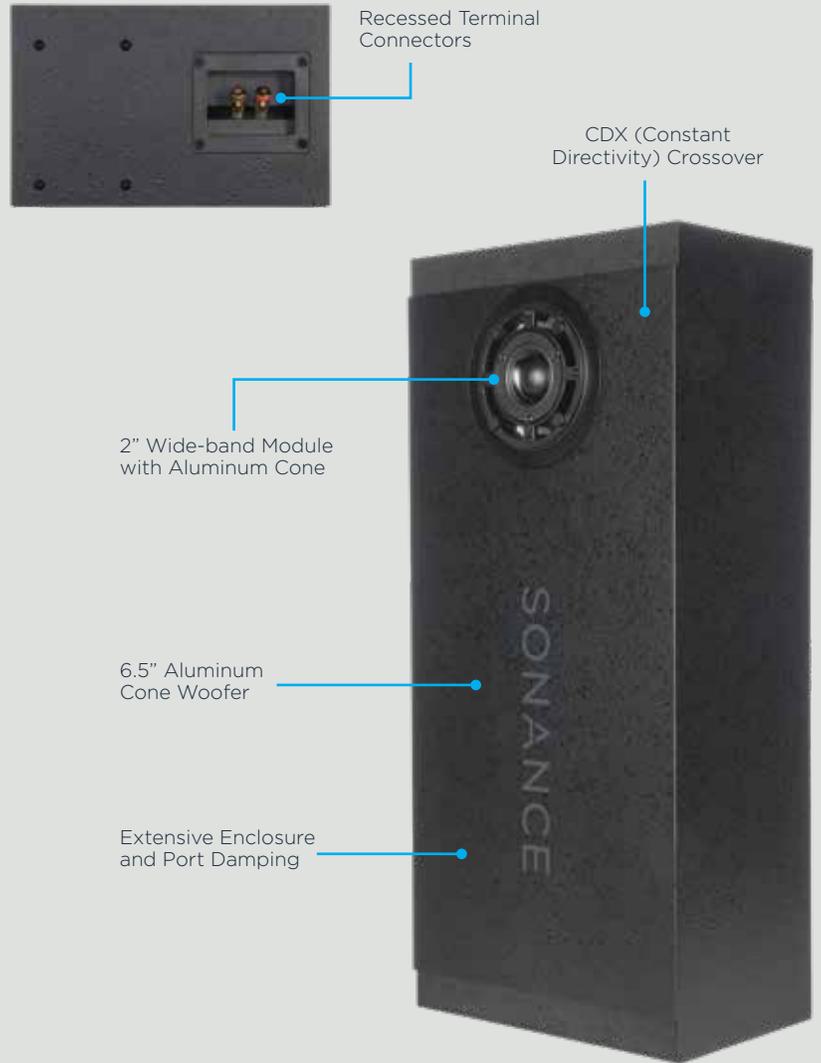

The SA4-66 Module features a secure wire clip connection for easy installation and serviceability.
