Care and use

Please retain these instructions for future reference. Before first use, ensure that you hand-wash the cookware thoroughly. This cookware is suitable for use on hobs only, including induction, and for optimum energy efficiency, it is important to place the cookware on hob rings that match its base size. Avoid allowing flames to overlap the sides or handles. To prolong the life of the cookware, it is advised to use silicone, wooden, or nylon utensils and to refrain from overheating or allowing it to boil dry. Never leave the cookware unattended while in use. Please note that the non-stick coating may discolour over time; however, this does not affect its functionality. To prevent damage to ceramic hobs, always lift the cookware instead of dragging it across the surface. Periodically check for loose screws; if necessary, use a screwdriver to retighten them carefully. When cleaning and storing the cookware, always allow it to cool before cleaning. The cookware is safe for dishwasher use with mild detergents, but it can also be hand-washed with a mild detergent and a non-abrasive sponge; make sure to rinse and dry it thoroughly. It is important not to store wet cookware. When handling hot cookware, always use heat-resistant oven gloves and never expose it to cold liquids. Should you notice any signs of damage, dispose of the cookware carefully.
