

# CHAIR ASSEMBLY INSTRUCTION

## MODEL 697-013

A plastic nylon insert is provided in the underside of each leg. Push the caster post into the hole of the insert so that the top of the caster is seated tight to the surface of the nylon insert. A slotted screw driver and hammer can be used to gently tap the caster into place. Use the blade of the screwdriver against the base of the post, which looks like a star, and tap the handle of the screw driver with the hammer. (4 Places)

Periodically check that all the connections are tight and secure.

Maximum Weight capacity = 300 pounds
