

SAFETY DATA SHEET
According to REACH Legislation EC 1907/2006

PF-Fiberseal Packing Fiber

Revision Date 2009-12-15

Classification	NFPA	PPE Personal Protection Equipment	Transport Symbol

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

Product name	PF-Fiberseal Packing Fiber
Commodity code	12001 - PFFIBER
Product description	Mineral wool fiber.
Product use	Electrical box insulation.

Manufacturer or supplier's details

Pyrotek Inc.
9503 E. Montgomery Avenue
Spokane Valley, WA 99206 USA
Phone: (509) 926-6212
Fax: (509) 927-2408

Email: MSDS@pyrotek-inc.com
REACH email: REACH@pyrotek-inc.com

Emergency telephone number

Chemtrec North America (800) 424-9300,
Chemtrec Outside North America +1 703 527 3887

2. HAZARDS IDENTIFICATION

This material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Physical state	Solid	
Appearance	Tape.	Odor Slight
Classification	-	
Symbol(s)	In accordance with Directive EC 1272/2008 and its amendments, this substance does not need to be classified nor labelled	R -phrase(s) None

See Section 11 for additional Toxicological information.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Names	CAS-No	EINECS-No.	Weight %	Classification
Phenolic Resin	9003-35-4		2 - 5%	-
PVA Resin	9002-89-5	n/a	0.5 - 1.5 %	-
Fibrous Glass	65997-17-3	266-046-0	> 95%	-

For the full text of the R phrases mentioned in this Section, see Section 16

Further information

Synthetic vitreous fibers (SVF) are fibrous inorganic substances classified into three general groups: fibrous glass (glasswool and glass filament), mineral wool (rockwool and slagwool), and refractory ceramic fibers (RCF). Devitrification (conversion of fibers to a crystalline state) may occur when SVF materials are exposed to high temperatures producing disordered crystalline silica forms.

Crystalline silica (SiO₂) exists in several forms: quartz, cristobalite and tridymite. Fused silica (non-crystalline quartz), if heated to more than 1200°C (2192°F) for an extended period, converts to crystalline silica in the form of tridymite. As heated crystalline silica slowly cools, its form can change. When cooled to approximately 870°C (1598°F), it can take on the form of crystalline quartz. Continued cooling below 573°C (487°F) can change the form to cristobalite. However, more rapid cooling from a high temperature may solidify any form of crystalline silica at normal temperatures.

Prolonged exposure to respirable crystalline silica may cause delayed (chronic) lung injury known as silicosis. Silicosis is a form of disabling pulmonary fibrosis, which can be progressive and may lead to death.

The OSHA PEL for crystalline silica as tridymite and cristobalite is one-half of the OSHA PEL for crystalline silica (quartz) - 0.1 mg/m³.

4. FIRST AID MEASURES

Eye contact	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If symptoms persist, call a physician.
Skin contact	Wash off with soap and water.
Ingestion	No information available. Consult a physician if necessary.

Inhalation Move to fresh air. If symptoms persist, call a physician.

Notes to physician Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Flammable properties The product is not flammable.

Suitable extinguishing media Carbon dioxide (CO₂). Water spray. Water. Dry chemical. Foam.

Unsuitable extinguishing media None known

Specific hazards arising from the chemical None known

Protective equipment and precautions for firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear

Australian Hazchem Code None known

NFPA Health - Flammability - Instability 0

HMIS Health - Flammability - Instability 0

6. ACCIDENTAL RELEASE MEASURES

Personal precautions Avoid dust formation. Use personal protective equipment.

Environmental precautions Local authorities should be advised if significant spillages cannot be contained.

Methods for cleaning up Vacuum or wet sweep. Take up mechanically and collect in suitable container for disposal. Avoid dust formation.

7. HANDLING AND STORAGE

Handling Handle in accordance with good industrial hygiene and safety practice. Wear personal protective equipment. Avoid dust formation.

Storage Keep in a dry place.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Occupational exposure controls

Engineering controls

Ensure adequate ventilation, especially in confined areas

PPE

If exposure limits are exceeded or irritation is experienced, the user must determine if any locally approved respiratory protection must be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Proper skin and eye protection should also be determined by the user. Respiratory, skin and eye protection must be provided in accordance with current local regulations. Considerations to aid the user in PPE assessments follow.

Respiratory protection	Respirator must be worn if exposed to dust. Dust mask P3/FFP3 or (P2/FFP2) under dusty conditions. During machining operations. Respiratory protection is not necessary at normal handling.
Eye protection	Safety glasses. Safety glasses with side-shields [EN166].
Skin protection	Long sleeved clothing. Protective gloves.

General industrial hygiene practice	Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. Remove and wash contaminated clothing before re-use.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state	Solid	
Appearance	Tape	
Color	Tan, -, Light yellow	
Odor	Slight	
pH	None known	
Flash point	No data available	
Melting point/range	1150°C / 2100°F	
Flammability Limits in Air	Upper None known	Lower None known
Specific Gravity	No data available	
Solubility	Insoluble.	

10. STABILITY AND REACTIVITY

Stability	Stable.
Conditions to avoid	None under normal processing.
Materials to avoid	Acids.
Hazardous decomposition products	Under fire conditions. Carbon oxides.
Possibility of hazardous reactions	Hazardous polymerization does not occur.

11. TOXICOLOGICAL INFORMATION

Acute toxicity

Component Information			
Chemical Names	LD50 Oral	LD50 Dermal	LC50 Inhalation
Phenolic Resin	5 g/kg Rat	2 g/kg Rat	-
PVA Resin	20 g/kg Rat	-	-
Fibrous Glass	-	-	-

Potential health effects**Principle Routes of Exposure**
Acute effects

Eye contact. Skin contact. Inhalation.

Eye irritation

Contact with eyes may cause irritation.

Skin irritation

Substance may cause slight skin irritation.

Ingestion

Not a normal route of exposure. None known.

Inhalation

May cause irritation of respiratory tract.

Chronic toxicity**Chronic toxicity**

None known

Carcinogenicity

The table below indicates whether each agency has listed any ingredient as a carcinogen:
