General

- RTI XP series control processor (two-way control) or RP4 control processor (one-way control).
- The device running the RTiPanel App and the control processor must be connected to the Ethernet network.
- Remote access requires a connection to the Internet and either a static IP address from the ISP (Internet Service Provider), or a dynamic DNS account implemented.
- Two-way control and off-site access requires an XP series control processor.

Apple iOS Devices

- RTiPanel App compatible with Apple iPad and iPhone.
- Apple devices require iOS 3.2 or higher

Android Devices

- Requires an XP series control processor (not compatible with RP-4).
- RTiPanel App compatible with Android smart phone and tablet devices.
- Android devices with touchscreen displays larger than 5.5" will require a tablet license.
- Android devices require 2.1 or higher

Microsoft Windows PCs

- IBM or compatible personal computer running Microsoft Windows 7, Windows 8 or higher operating system.
- At least 256 Megabytes (MB) of RAM.
- 16 bit color monitor (16 bit color 1024x768 or better recommended, 256 colors not supported).

Fully customizable using the RTI Integration Designer programming software, the RTiPanel offers the same intuitive control experience RTI remote controls offer, running on an Apple or Android smart phone or tablet device as well as on a Windows® PC. Providing secure local or remote access to an RTI control processor from any Internet connection, the RTiPanel allows for control via LAN, Wi-Fi and WAN control off site. When used with an XP series control processor, users can view and adjust thermostats, monitor security systems and turn off lights, in addition to controlling their A/V electronics, from the office, on vacation, or virtually anywhere in between. The RTiPanel app is also available for local, one-way control using the RP-4 control processor.

Key Features

- Control and receive feedback from audio, video, lighting, security, climate, and more!
- RTiPanel app available through Apple App Store®, Google Play® and the Amazon App Store®
- Fully integrate Apple iPad®, iPhone®, iPod Touch®, Android™ devices and Windows® PCs into RTI control systems utilizing an XP series and RP-4 control processor.
- Completely customizable graphical interface.
- Supports creation of both portrait and landscape views with minimal extra programming required.
- RTiPanel supports full two-way feedback, including cover art, graphics, text, dynamic scrolling lists, and more (Requires XP processor).
- Supports local connection via LAN, and off-site access via WiFi or cellular data (if available), with automatic switching.
- Highly optimized for fast connection times.
- Control system programming stored on Apple/Android/Windows devices and updates automatically when changes are made.
