

Compatible with Apple Magsafe Accessories

Integrated Lanyard Attachment Location

Fits Multiple Payment Processor Models

Removable Lightning Adapter

Transform iPhone into a protected, mobile point-of-sale for Retail and Restaurants.

The IPORT CONNECT Phone products build upon the CONNECT platform and increase the power of using iPhone as a mobile point of sales device. The IPORT CONNECT Phone Case and Dock systems can be partnered with a mobile payment processor to complete the mobile POS experience. Both the iPhone Dock and iPhone MultiDock can accept and simultaneously charge both the iPhone and a payment processor eliminating the need for extra cables maximizes valuable Back of House counter space. CONNECT Phone Case will work with Apple Magsafe accessories if not utilizing a payment processor case in tandem with the iPhone. CONNECT Case for iPhone continues IPORT's dedication to innovation and providing dedicated iOS tools to take your business to the next level.
