

3M™ Dual Lock™ Reclosable Fasteners

Versatile | Super-Strong Bond

Store a mini PC tower, keyboard, and more in our wall-mounted workstations and storage cabinets with 3M™ Dual Lock™ Reclosable Fasteners. Featuring an exceptionally strong adhesive backing, these fastening strips help enable an extremely efficient configuration of interior space. Confidently secure and organize computer components and other items, utilizing areas that aren't ideal for shelves or easily accessed.

Features:

- Easy to attach, no tools required
- Lightweight alternative to metal fasteners
- 3M™ Dual Lock™ provides up to 5X the tensile strength of typical hook-and-loop products
- Secures with an audible snap, verifying closure
- Set of ten (10) L3" x W1" reclosable fasteners with adhesive backing

+ 84999-0025

Quick, tool-free installation—no drilling or screwing needed

Secure computer components, essential equipment, or other items inside our wall-mounted workstations and storage cabinets without tools and in less time. The high-strength adhesive backing on these 3M™ Dual Lock™ Reclosable Fasteners bonds well to a variety of substrates.

Simply attach these fastening strips to nearly anything for a snug fit, turning awkward or otherwise inaccessible interior space into usable, organized storage. Nestle a mini PC under the head of the box, for example, or suspend it on a back wall, freeing shelves for other needs.

3M™ Dual Lock™ Reclosable Fasteners

Versatile | Super-Strong Bond

Package includes: Ten (10) L3" x W1" 3M™ Dual Lock™ Reclosable Fasteners with adhesive backing.

Product Dimensions	L3" x W1"
Thickness	3.51 MM per side, 5.74 mm total
Weight Capacity	Holds up to 50 lbs
Capacity (Diameter)	11 mm
Color	Clear
Material	Acrylic tape with silicone treated polyolefin peel away liner
Warranty	90 days
Cycle Life	1000 closures before losing 50% original strength
Usage	Ideal for securing electronics and other objects directly to the back or sides of our wall-mounted workstations and storage cabinets

Mounting Tips

We recommend mounting electronics with the adhesive fastening strips in an "X" configuration. This reduces the strength required to remove the attached item, lessening the risk of pulling the adhesive bond loose.

The same "X" configuration also allows for more misalignment of the attached item when removing or replacing it. Since the fastening strips are blocked by the attached item, an "X" configuration allows the item to be easily re-adhered even when further from the original position.
