A Closer Look

Novus Attenzia Task is designed to provide the best quality of light for your personal workspace. The recessed LEDs produce an adjustable brightness of up to 742 lumens for a vibrant, white light that reduces eye strain and improves focus. It features pivoting joints, aluminum construction, and a thin rotating lamp that allows you to focus the light right where you need it.

Illuminating Light

Attenzia's energy-efficient LEDs produce a vibrant white light that's easy on the eyes. At 4,000 Kelvin, the temperature is ideal for reducing eye strain in work environments. It's easy to adjust the brightness up or down with the push of a button and the memory setting always remembers your preferred illumination.

Easy Positioning

The Attenzia Task swivels on its base, has pivoting joints, and a rotating lamp head that allows you to focus the light just where you need it. This Attenzia model includes a base plate and can also be mounted on a desk clamp, system rail, or Novus SlatWall.

Guaranteed Quality

Aluminum construction gives the Attenzia Task strength and a smooth, modern finish. This light is German engineered and designed for quality and durability. The LEDs are guaranteed for 50,000 hours of use and the light is backed by a 5 year warranty.

Focused Illumination

Adjust Novus Attenzia Task lighting right where you need it.

Dimmable Brightness

Attenzia dims with the touch of a button and remembers your last setting.

Easy to Position

Pivoting joints and a rotating lamp head let you focus the light right where you need it.
