

Beldray Flat Bed Airer

LA035754FEU7

Please retain instructions for future reference.

Care and use

When using the airer, it is essential to observe the following precautions to ensure safety and optimal performance. The maximum load capacity is 6 kg; therefore, do not overload the airer and always distribute the weight evenly to maintain stability. Please be cautious to avoid trapping your hands when opening and closing the airer, and remember that it is designed for indoor use only. Under no circumstances should the airer be moved once laden or dragged, as this may put undue strain on its legs. To properly use the airer, first remove all packaging, then stand it upright on the floor. Carefully raise the drying area away from the legs and secure the airer in an upright position by sliding the leg across.

Made in **China**.
