

SECURESAFE™ SAFETY INSULIN SYRINGES

Dynarex SecureSafe Insulin Syringes are high-quality hypodermic syringes designed to deliver insulin effectively and precisely. Each sterile, disposable syringe is securely attached to prevent needle pop-off and features a locking protective sheath that helps prevent needlestick injuries. The needle is coated with medical-grade lubricant and has a double-beveled tip for smoother insertion and improved patient comfort. The transparent barrel is clearly marked with bold font for accurate dose measurement.

- Hypodermic syringe designed to effectively and precisely deliver insulin
- Pull-and-twist safety mechanism helps protect against accidental needlesticks
- Stainless steel needle is securely attached to prevent needle pop-off
- Transparent barrel with large-font gradations allows for accurate measurement
- Lubricated double-beveled needle helps improve patient comfort
- For use with U-100 insulin
- Sterile, non-toxic, and non-pyrogenic
- Disposable and individually sealed for optimal hygiene
- Not made with natural rubber latex
- 100 syringes per box, 5 boxes per case

Item	Gauge	Diameter	Length	CC
