FILTERED WATER STATIONS

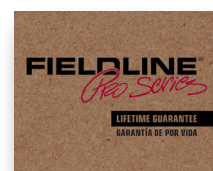

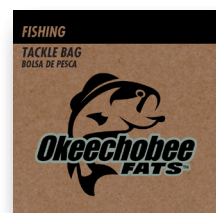

SINCE 2020

100% RECYCLED FABRICS

GREEN CIRCLE are the polyester fibers made by GREEN CIRCLE recycling system. Compared with the traditional technology, GREEN CIRCLE FIBERS can reduce approximate 50% of energy consumption and carbon dioxide emissions.

RECYCLED PACKAGING

SINCE 2022

ACHIEVED GRS CERTIFICATION

WHAT DOES THAT MEAN?

Global Recycle Standard (GRS) is intended to meet the needs of companies looking to verify the recycled content of their products (both finished and intermediate) and to verify responsible social, environmental and chemical practices in their production.

MEMBERS OF How2Recycle

How2Recycle is a standardized labeling system that clearly communicates recycling instructions to the public. It involves a coalition of forward thinking brands who want their packaging to be recycled and are empowering consumers through smart packaging labels.

ELECTRIC CAR CHARGING STATIONS

TORG has installed an electric vehicle charging station. This is open to all to charge their electric vehicles during office hours.

SINCE 2024

100% RECYCLED PACKING MATERIAL

WHAT DOES THAT MEAN?

Instead of plastic polybags, we will now use a sustainable protective clear bag; cardboard cartons will include How2Recycle instructions; and packing tape becomes renewable and biodegradable tape.

100% RECYCLED PACKAGING

WHAT DOES THAT MEAN?

The dyes that we currently use will become biodegradable dyes. We will be using solvent-free adhesives, and UPC stickers will now be eco-friendly and compostable labels.

WORK WITH FLEXPORTR

Work with Flexport to maintain schedule integrity and reduce transportation emissions.
