

THE EARTH IS NOT FLAT

ARCHITECTURAL CERAMIC

Redefining the vision of space; elegant and subtle yet contemporary, whilst maintaining the qualities of ceramic: durability and resistance.

VERSATILITY

Freedom of creativity. Let your imagination soar.

Avant-garde technology and an experienced creative team, let customers explore their ideas and needs.

Inspiration, empathy and flexibility.

A CONTEMPORARY AND
ARCHITECTURAL VISION OF
TRADITIONAL CERAMIC

THE ART OF
DESIGNING WITH
LIGHT AND SHADOW

ETERNAL VERSUS THE EPHEMERAL

The integration of Light and Shadow
in architecture.

Surfaces that shift and transform with the
changing of light and seasons.

Represents the unexpected in a solid,
reliable and practical solution.

DESIGNED & MANUFACTURED BY WOW

WOW is a design studio, specialized in high end ceramic collections.

With headquarters in Spain, it is complemented by our own research and development laboratory, production facilities, warehousing and equipped with the latest technologies .

From concept to final product.

WAVE CONTRACT

MINI HEXA CONTRACT

NILO L CONTRACT

MINI HEXA LISO

BEFORE INSTALLING THE PRODUCT

The surface where the product is being installed must be clean and level.
It is recommended that the layout of the product is prepared before the final installation.
Make sure you choose an adhesive apt for the area where the product is being installed.
For installation on porous surfaces we recommend: Kerakoll Special® Eco, and for Non-porous surfaces: Kerakoll serie H40® Eco.
Also recommended as grouting mortar: Kerakoll Fugabella® Eco Porcelana 0-5 and for the areas susceptible to stains such as the backsplash: Kerakoll Fugalite® Eco.

TO ENHANCE YOUR WOW PRODUCT

In order to obtain the maximum WOW effect, use 1 mm - 0 3/64 in (0,5 mm - 0 1/64 in for CUE) spacers between the tiles to maintain an even installation over the whole surface.
If the area where installing the material is not exposed to humidity, grouting is optional , we recommend to use spacers of 0.5 mm without grout between the pieces.
In items Moon & Nilo Porcelain It is recommended 2 mm (0 5/64 in) spacers between pieces.
The colour of the grout should be as close as possible to the colour of your product.
Once the area has been grouted, and before the grout dries, remove any excess material with a damp sponge.
To enhance the light and shadow effect of WOW, adequate vertical lighting over the product should be installed (ideally, above the highest point of the installation)

MAINTENANCE

Maintenance free. Easy and practical to care for, due to the high standard of technical characteristics in each WOW ceramic product.
Avoid abrasive or acidic cleaning products.
For the Concrete items, it is recommended to clean with clear water.

ATTENTION!

The steel finish may contain small pinholes, inherent in this type of glaze, which do not influence the technical features of the product. No claims will be accepted after materials have been installed.

ANTES DE LA COLOCACIÓN

Preparar la superficie sobre la que se va a colocar tu producto WOW. Debe estar limpia y aplomada.
Se recomienda plantear la colocación, previo a su instalación.
Elegir el material de agarre en función de las características de la superficie.
Se recomienda para colocación general en superficies porosas: Kerakoll special® Eco. y para superficies no porosas como el pladur: kerakoll serie H40® Eco.
Se recomienda utilizar el tipo de mortero de rejuntado en función de la zona de colocación. Colocación general: Kerakoll fugabella® Eco porcelana 0-5 y para las zonas más susceptibles a manchas como pueda ser la cocina: Kerakoll Fugalite® Eco.

PARA ENSALZAR EL ASPECTO DE TU PRODUCTO WOW

Se recomiendan separadores de 1mm (0,5 mm para el modelo CUE) para colocar las piezas y conseguir de esta forma un aspecto WOW óptimo. Si la zona de colocación del material no va a estar expuesta a la humedad, se puede evitar el material de rejuntado, dejando solamente 0,5 mm de separación entre piezas.
En los modelos Moon Porcelain y Nilo Porcelain se recomienda utilizar 2 mm de junta.
También es aconsejable que el color de rejuntado sea similar al color del producto elegido.
Una vez rejuntado el producto, y antes de que se endurezca, retirar el material sobrante de rejuntado con una esponja mojada en agua.
Para potenciar el pronunciado efecto de luz y sombra sobre cada pieza, es de vital importancia colocar luz cenital, situada verticalmente sobre el producto.

MANTENIMIENTO

Práctico y sencillo de limpiar, dadas las excelentes características técnicas del producto WOW, tan sólo es necesario un cuidado rutinario, evitando la utilización de productos abrasivos o ácidos.
En el caso de los productos Concrete se recomienda limpiar exclusivamente con agua limpia.

¡ATENCIÓN!

El acabado Steel puede contener pequeños pinchados, característicos de los esmaltes reactivos, que no influyen en las características técnicas del producto. No se aceptarán reclamaciones una vez instalado el material.
