TOOLS REQUIRED

- Tape measure
- Nail or marker
- Phillips screwdriver
- Level
- Mounting hardware (provided)

UNPACKING THE GAME

After unpacking the game, it is important to save the original box, all packing material, and the receipt. These items will be needed if it ever proves necessary to return the game for service.

MOUNTING (PHYSICAL INSTALLATION)

Two methods for mounting the dartboard are available.

1. Use the two keyhole slots and mount the center of the dartboard following the illustration. The two screws are screwed into the wall until the screw head is 3/8" away from the wall. The dartboard is positioned so the two screw heads are inside the keyhole. Slide the dartboard down to secure. The head of the screw that is used must be larger than 5/16" and smaller than 3/8".
2. Four equally spaced holes are accessible from the front to drive in screws. With the dartboard held in place, four screws are driven in from the front, through the existing holes. Use 1/8" diameter screws. The head of the screw must fit inside the pocket.

Wall Anchors

A wall with studs is the most common type of wall to mount the dartboard.

1. Locate a stud and use wood screws or sheet metal type screws to secure the dartboard.
2. If a stud cannot be located or is not in the proper location, use an anchor that is suitable for the type of wall.

Some common anchors are:

Plastic - Drill a snug hole in drywall and push the anchor in up to the head. When the screw is screwed into the anchor, the plastic will expand, locking the anchor in place. Do not use on thin panelling.

Toggle Bolt - Drill hole through wall. Hole must be large enough for the wings to pass through. Insert screw through the holes in the dartboard and thread the toggle wings just onto the screw. Fold the wings back and push through the hole until the wings spring open. Pull back on the screw to hold wings against the inside of the wall and tighten screw.

Hollow wall anchor - Drill a snug hole through the wall. Tap anchor into the hole until the prongs on the underside of the head are seated securely into the wall. Turn screw in and apply pressure to keep the anchor head from turning. Tighten screw until resistance is felt. Do not over tighten. Turn screw out to remove. Anchor will stay and screw can be replaced.

Other methods are available. Consult a hardware store if questions arise.

Mounting Using the Keyhole Slots

1. Choose a location that is near an electrical outlet and has at least 10 feet of open floor space in front of the board. Locate and use a wall stud for mounting whenever possible.
2. Determine the location for the dartboard. Place a mark on the wall 68 inches (172.7 cm) from the floor. This mark is the final position of the center of the dartboard (bullseye).
3. Locate studs and use wood screws or sheet metal screws to secure the dartboard if the mark is on the stud. The head of the screw must be larger than 5/16" and smaller than 3/8".
4. If the mark is not over a stud, use the mounting hardware that came with your dartboard.
5. Measure 8-3/4" (22.2 cm) directly up from the bullseye mark and place a mark on the wall. Then measure down 8-1/2" (21.6 cm) from the bullseye mark and place a mark on the wall. Use a level to check that all marks are vertical.
6. Drill pilot holes at the two marks. These are for the mounting screws.
7. If using wall anchors, follow the instructions under *Wall Anchors* on page 5.
8. Insert screws into anchors until a 1/4" (6.5 mm) gap is left between the wall and the screw head.
9. Hold the dartboard so the two screw heads fit into the lower part of the keyholes. The dartboard should slide down 1/2 inch and the screw heads will hold it on the wall.
10. Screws can be tightened or loosened to provide a secure mounting.

Mounting Using the Four Holes From the Front

1. Choose a location that is near an electrical outlet and has at least 10 feet of open floor space in front of the board. Locate and use a wall stud for mounting whenever possible.
2. Two people are needed for this step. Hold board on the wall. Position center of bullseye 68" from the floor. Level the board. Hold in place.
3. Locate the four mounting holes on the front of the board. Use a marker or nail to mark the position of the board through the four mounting holes onto the wall. Remove the board.
4. Drill four pilot holes on the marks created in Step 3.
5. If using plastic anchors: drill the holes so the anchors fit snugly. Push anchors into place.
6. Line up dartboard over anchors. Screw board into place. The screws will expand the anchors.
7. After the board is mounted, the bullseye should be 68" (173 cm) above the floor.

Create the Toe Line

Place a toe line 96" from the face of the board for the throwing distance. Adhesive tape or masking tape, 2' long by 2-1/2" wide, may be used. GLD Products offers a Viper Throwing Line and a Dart Mat for this purpose. Refer to the parts order form at the back of this manual.

POWER INSTALLATION

The 797 dartboard is powered by an external power supply.

The power supply must be 120V, 60 Hz, 12 w input with 1000 mA, 5 VDC output. The round plug for the dartboard has a positive outside and a negative center. Plug the power supply into the jack on the side of the dartboard.

To conserve power, this dartboard is equipped with a sleep mode and an auto power-off mode. If the dartboard is not being used, it will automatically enter sleep mode after 5 minutes and will turn off after 30 minutes.

1. The board is not intended for children under the age of 3 years old.
2. The board must only be used with the recommended transformer.
3. The transformer is not a toy.
4. Disconnect the dartboard from the transformer before cleaning.

PROTECTIVE FILM

This electronic dartboard has a clear protective film over the entire display and button area to prevent scratching during shipping. It is recommended that you remove this film for easier reading of the display. To remove, simply lift edge, peel off and discard.

WARNING:

Not for use by children without adult supervision. Darts are not toys and may cause injury if used improperly. Everyone must stand behind the dart thrower.

IMPORTANT NOTES

1. During shipping or in the course of normal play, it is possible for scoring segments of this board to become temporarily jammed, resulting in a "frozen" board. If this occurs, the built-in **Self Diagnostic Function** of the e-BOARD Computer will be activated automatically. Your dartboard will run a self-test routine to determine which segment is stuck. An error message will flash on the display together with the number for the "Frozen" segment.

Error Code

OE rr 25 D
OE rr 25
OE rr XX
OE rr XX D
OE rr XX T

Malfunction

Inner Bullseye
Outer Bullseye
Single segment for the number displayed at "XX"
Double segment for the number displayed at "XX"
Triple segment for the number displayed at "XX"

Take the following steps immediately when the error message appears.

- a. Find the “frozen” segment according to the display.
 - b. Press firmly down on the “frozen” segment until it breaks free and the loose fit is restored. Once the “frozen” segments are loosened, the error message should be gone and the board will continue to operate normally.
2. This game is designed for use with 3/4" length soft-tip darts only! Never use metal tipped darts or longer soft-tip darts on this dartboard! Metal tipped darts will seriously damage the circuitry, the e-BOARD computer, and electronic operation of the dartboard.
 3. Electronic and mechanical reaction time is required between shots. If two shots occur too close together, pull out second dart and rethrow to properly record your score.
 4. Use only the provided AC adapter. **Using the wrong adapter may cause electrical shock and damage to the unit.**
 5. Do not use excessive force when throwing darts. Throwing a dart too hard will cause frequent tip breakage and cause excessive wear on the board.
 6. Do not spill liquids on the dartboard. Do not use spray cleaners that contain ammonia or other harsh chemicals, as they may damage the dartboard. Instead, we suggest regular dusting with a damp cloth. Make sure the game is unplugged and use a mild detergent and a damp cloth for more vigorous cleaning.
 7. This game is for indoor use only.

Helpful Tip: To prevent dart tips from loosening, twist the dart to the right (clockwise) when pulling it from the board. This motion will make dart removal easier and will prolong the life of your dart tips.

SELF-TEST

With the board turned off, press and hold the two single segments of #20. Power on the dartboard and watch the display. The segments will be displayed in sequence. If any of the segments are not displayed, the display is damaged.

- The cricket display will keep track of how many times you find gold.
- Since gold can make you greedy, whenever you “Find Gold” you will also steal 1 gold from every player who has gold.
- To score and attempt to “Find Gold” players take turns throwing darts at the dartboard.
- The number on the dartboard that you hit will be your score. A double segment is worth double points and a triple is worth triple points.

- Following the standard rules, in Quick Cricket only the numbers 15-20 and bullseye are used.
- If every player has opened a number, that number will then close.
- All valid hits will be confirmed and displayed by the Cricket Display.

Cricket Status	One Time	Two Times	Open	Close
Sign	\	X

G11 American Cricket (with scoring options of C00, C20, C25)**Game Options:**

Double Bull

Single Bull

The scoring options are described in the chart below.

Scoring Options	Description

C25	Hit and open bullseye first, then in order, open numbers 15, 16, 17, 18, 19 and 20.

Refer to the section “Read First - Operation”.

Playing the Game

To win: The first player to open all their numbers wins.

- Same as Quick Cricket, except more complicated scoring and winning procedures as follows:
 - When a number has been hit 3 times by a player, it is then open to that player and any further hits by that player will score points.
 - Once a number has been hit 3 times by all the players, that number is then closed and can no longer be scored upon by any player. At that time the indicator will change to closed for that number.
 - A player who has opened a number can continue to score on that number until it becomes closed.
 - A player wins the game when he first opens all the numbers and has an equal or greater score than the other players. However, if players are tied on points, or have no points, the first player to open all numbers wins.
 - If a player has opened all numbers first, but is behind on points, scoring continues on open numbers. If that player has not accumulated the highest point total by the time another player opens all their numbers, the player with the most points will be the winner.

- The game consists of 2 rounds.
- In the first round, player 1 must close 15 through 20 and bullseye while player 2 attempts to get as high a score as he can by scoring on the open numbers.
- Round 1 will be finished when all numbers have been closed.
- For round 2, the reverse is done. During round 2, if Player 1’s score goes over Player 2’s score the game will end and Player 1 will be the winner.
- If Player 2 closes all the numbers and has a higher score than Player 1, Player 2 will be the winner.

Refer to the section “Read First - Operation”.

Playing the Game

To win: The first player with the highest score wins.

- This game is the same as American Cricket EXCEPT that you have to hit a double segment for each number first. That will give you 2 hits, you still need one more hit to open that number for scoring.
- Once all players have opened a number that number will close and no one can score on it anymore.
- For example: to start with the number 20, you must hit the double 20 segment. Any hits before you do this will count as a miss. Once you’ve hit your double 20 you have three possibilities for that number:
 - If you hit a single 20 it will open the 20 for scoring.
 - If you hit a double 20 it will open the 20 for scoring and score you 20 points.
 - If you hit a triple 20 it will open the 20 for scoring and score you 40 points.

Refer to the section “Read First - Operation”.

Playing the Game

- The game is played the same as Round-The-Clock EXCEPT that doubles and triples advance you the amount of the double or triple plus one. For example hitting double 1 will move you to number 3.
- Once you pass the number 10, the double and triple segments will count as a miss. If you hit a double 10 your next number will be the bullseye.
