## *Dimensions (in inches)*

*Dimension from wall to front of closed door handle is 27-3/4".

| KW Rating | |
|---|---|
| **240V** | 11.7 |
| **208V** | 8.8 |
| **Breaker Size** | |
| 40 Amps† | |

†***Note:*** Check local codes for required breaker size.

A properly grounded branch circuit with a 3 prong grounding type receptacle is required for GE ranges.

***Receptacle Locations***

Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

***Note:*** 30" ranges conform to U.L. requirements for 0" spacing from adjacent walls below countertops. To reduce possibility of scorching of walls, engineering recommends a minimum of 1-1/2" spacing to allow for possible extended, high-heat, no-load heating element operation.

***Installation Information:*** Before installing, consult installation instructions packed with product for current dimensional data.
