

Aluminum Crutches

DME Care Solutions Aluminum Crutches are durable mobility aids designed to accommodate a wide range of users. Featuring a sturdy aluminum frame, convenient push-button height adjustment, cushioned underarm pads, and comfortable hand grips, these crutches offer reliable support for both children and adults.

- Lightweight anodized aluminum frame
- Non-skid rubber tips help provide reliable traction
- Comfortable underarm pads and secure hand grips
- Crutch-bow ends increase flexibility and help prevent slipping
- Push-button height adjustment allows 1-inch incremental changes
- Weight capacity 350 lb.
- HCPC: E0114
