NOTES:
For optimum performance of this product, we recommend a system pressure between 20 and 80 PSI static. This product will operate up to a maximum of 125 PSI static per ANSI and CSA requirements. However, we do not recommend pressure above 80 PSI. Thermal expansion or leaking pressure reducing valves may require use of expansion tanks or relief valves to ensure your system never exceeds its maximum intended pressure setting.
Designed for routine 180°F (82°C) disinfection cycles up to 10 minutes.
Hardwire Proximity models not for use on enamel covered metal sinks.
