

DIESEL ANTI PARAFFIN

1. General description

Improves the resistance to frost for diesel and fuel oil. Prevents the formation of bigger paraffin crystals. Improves the flow and ability to filter. Depending on the kind of diesel and quality, the CFPP (Cold Filter Plugging Point) can be forced down with 10°C. This enables to bring the CFPP of a winter diesel without additive down to -31°C. Suitable for all diesel engines.

2. Features

- Ashless.
- Low temperature flow improver.
- Provides superior CFPP and pour point depression.
- Minimizing the need for kerosene dilutions.

3. Applications

- In all grades of diesel.

4. Directions

- Store the additive in a well ventilated place, above 9°C. Add the additive to the diesel only when the temperature of the diesel and the additive are above 9°C.
- Mount the spout on the can.
- Pour the complete content of the can into an almost empty fuel tank. Dose is sufficient for one passenger car.
- Fill up the fuel tank as outlined in the users' manual of the engine.
- **A safety data sheet (MSDS) according to EC Regulation N° 1907/2006 Art.31 and amendments is available for all CRC products.**

5. Typical product data (without propellant)

Appearance	E Liquid.
Color	Amber.
Odor	Characteristic odor.
Density	0.884 g/cm ³ (@ 20°C).
Flash Point	> 62 °C

Remarks

All statements in this publication are based on service experience and/or laboratory testing. Because of the wide variety of equipment, conditions of use and the unpredictable human factors involved, we recommend that our products are tested on-the-job prior to use. All information is given in good faith but without warranty neither expressed nor implied. This Technical Data Sheet may already have been revised as a result of a change in legislation, availability of components or newly acquired experiences.
