SAFETY EYEWEAR

TYPE-G

EYEWEAR PROTECTION

When dust, particles, and moisture compromise visibility, Vision Type-G creates a sealed barrier without sacrificing airflow. A fixed foam gasket blocks small debris from entering, while integrated ventilation channels reduce heat buildup. Designed for environments where exposure is constant and protection can't fail.

FEATURES

- 1 Foam gasket seal (non-removable) blocks dust, particles, and debris intrusion.
- 2 Strategic venting system improves airflow and reduces fogging.
- 3 Advanced antifog coating maintains visibility in sealed conditions.
- 4 Scratch-resistant lens withstands abrasive environments.
- 5 Wraparound structure improves protection and secure fit.
- 6 Soft padding with debossed grip pattern enhances comfort and stability.
- 7 UV protection lens shields against outdoor exposure.
