Care and use

Please retain these instructions for future reference. Before first use, ensure the cookware is hand-washed thoroughly. This cookware is suitable for use on hobs only, including induction. For optimal energy efficiency, place the cookware on hob rings that match the base size, and avoid letting flames overlap the sides or handles. To extend the life of the cookware, it is recommended to use silicone, wooden, or nylon utensils, while metal utensils should be avoided. Care must be taken not to overheat the cookware or allow it to boil dry, and it should never be left unattended while in use. Please note that the non-stick coating may discolour over time, although this does not affect the cookware's functionality. To prevent damage to ceramic hobs, always lift the cookware rather than dragging it across the surface, and be aware that screws may loosen over time; these can be carefully retightened with a screwdriver. For cleaning and storing, always allow the cookware to cool before cleaning, as it is not dishwasher safe. Hand-wash the cookware using a mild detergent and a non-abrasive sponge, then rinse and dry thoroughly. Ensure that you do not store the cookware while it is wet. Additionally, avoid exposing hot cookware to cold liquids, and if there is any evidence of damage, dispose of the cookware carefully.
