SAFETY EYEWEAR

TYPE-A

EYEWEAR PROTECTION

Built for high-impact environments, Vision Type-A combines wraparound protection with all-day wearability. The frame is engineered to meet demanding standards while maintaining a secure, comfortable fit. Advanced coatings and reinforced construction ensure visibility and durability don't drop off under pressure.

FEATURES

- 1 Wraparound lens design increases coverage and protects against debris.
- 2 Advanced antifog coating keeps vision clear through movement and heat.
- 3 Scratch-resistant lens resists damage in high-contact environments.
- 4 Mil-spec inspired construction delivers dependable protection.
- 5 Comfort-focused nose and ear design improves fit over long shifts.
- 6 Lightweight structure balances protection with wearability.
- 7 UV protection lens shields against prolonged sun exposure
