

TSS Control Center

Novus Four Monitor Arm Set

The Novus TSS Control Center enhances ergonomic comfort by elevating four monitors for perfectly aligned viewing. It features pivoting joints for ergonomic adjustments, aluminum construction for durability, and two desk clamp mounts for stability. German engineered for quality, this monitor arm is ideal for high-productivity environments.

Features | Benefits

- Designed for easy alignment of four monitors for side-by-side viewing
- Enhances ergonomic comfort with easy adjustments
- Creates more space by elevating a monitor above the work surface
- Easily rotate monitor from portrait to landscape position
- German engineered with aluminum construction guarantees quality and durability
- Integrated cable management hides wires and provides a clean, organized look
- Quick Release connection makes it easy to relocate or upgrade monitors
- Includes system clamp base mounts for secure placement

Increase workspace by elevating screens above the desk.

QuickRelease connection makes it easy to relocate or upgrade monitors.

The TSS Control Center's space-saving design elevates and aligns four monitors perfectly for the most comfortable viewing position.

Toolbar and adjustable Folding Arms allow for perfect monitor alignment.

The anodized aluminum column includes cable clips for a clean look.

Included drilling screw mounts anywhere on the desk surface to provide firm support.
