

SharkBite Max™

Polybutylene Adapters

SharkBite Max™ allows users to connect pipe with ease - no tools needed. This new design features a stainless steel retainer for extra strength, higher pressure ratings (400 psi) and a lower insertion effort than previous versions of SharkBite Brass Push to-Connect fittings. SharkBite Max polybutylene adapters require a tube stiffener on the polybutylene connection end and are included with the fitting. The other connection side does not require a PEX stiffener and are compatible with PEX, copper, CPVC, PE-RT and HDPE*.

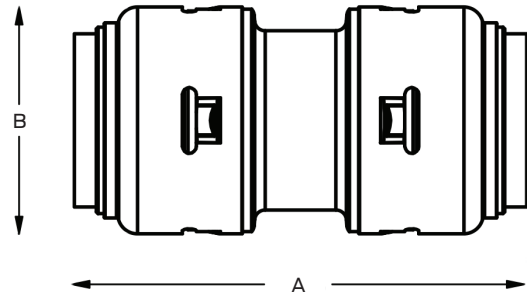

Applications

Residential and commercial potable water, recirculation, hydronic heating/cooling (up to 50% glycol concentration) and direct burial (wrapping required).
