

# MetSafe™ MD1

**Metal Detectable Safety Glass with IQuity™**  
For Food Service Applications

Lightweight comfort - less than 1oz

Integrated Nosepiece

## OVER 2.5x MORE METAL\*

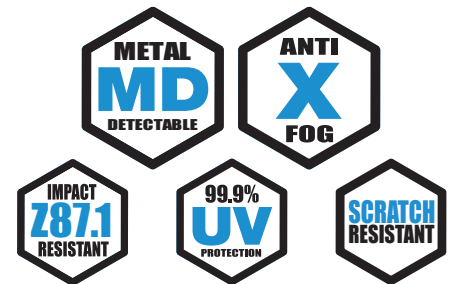

Overmolded metal across lens brow, in temples, plus steel pins, for component-level detectability

## UNMATCHED DETECTABILITY

The MetSafe™ MD1 safety glass offers unmatched metal detectability for use in food service applications, thanks to an overmolded metal skeleton for the temples and wire spanning across the full width of a one-piece lens. Steel pins add to the detectability and durability of this ergonomic lightweight design, while Radians' proprietary IQuity™ coating provides for premium, long-lasting anti-fog and anti-scratch performance. Blue temples and a blue lens ribbon enhance visual identification.
