Smart Entrance Hardware

Home automation at your fingertips, the stylish Schlage Encode™ Smart Wi-Fi Deadbolt ***gives you total control.***

Making homes smarter.

The revolutionary Schlage Encode™ Smart Wi-Fi Deadbolt connects directly to your home Wi-Fi. There's no need for extra accessories or hubs, allowing you full control of your lock from anywhere.

Simply pair your lock with the Schlage Home app on your smartphone to lock or unlock your door and add or delete user codes from anywhere. You specify who has access and when by setting up to 100 codes, or sending virtual keys to guests via text or email.

Total control and peace of mind at your fingertips.

Visit **schlage.co.nz/encode** or scan the QR code for more information.

SCHLAGE HOME | works with alexa | works with Hey Google

Features and benefits

- Built-in Wi-Fi allows you to access your lock from anywhere
- Use voice commands via Amazon Alexa and Google Assistant
- Program access codes for temporary or recurring visitors
- Receive notifications when your lock has been accessed
- Can be retrofitted in minutes using a screwdriver
- View the date and time each code has been used, through the history feature in the Schlage Home app
- Low battery indicator offers weeks of advanced warning for battery replacement

SCHLAGE

Levers and Knobs

Design elevates the functional to the sublime.
Clever design is unobtrusive, yet distinct.
Beautiful design delights the senses, challenges us and inspires joy every day.

Designer style

Schlage Verta™ reinvents the classic with contemporary design. Stemming from modern trends, Verta blends beautiful form with designer functionality.

Verta's design features set a new standard for innovative style. Architectural lines create surfaces that reflect light in every direction; tactile surfaces surprise and delight; lineal planes soften to curved edges.

Each element of Verta has been sourced, crafted and finished by experts. Constructed from the highest-quality, marine-grade 316 stainless steel, Verta is manufactured and finished with watch-maker precision.

Verta is an investment in style for now and the future.

Features and benefits

- Constructed from marine-grade stainless steel gives Verta strength, presence and lasting beauty
- Straight edges transition to gently rounded backs, curving into your hand and creating a soft touching point
- Enhance your home inside and out from the striking pull handle (page 15) to the internal furniture
- Tested to precision to endurance standards of 200,000 cycles

F SERIES
- Lifetime mechanical warranty
- For finish warranties please refer to our website
- **Door preparation:** 54mm
- **Backset:** 60 or 70mm adjustable latches
- **Door thickness:** 35mm to 44mm
- **Cylinder:** Schlage C5
- ANSI/BHMA certified. Graded best in security, durability and finish (AAA)

CLASSIC SERIES
- 10 year mechanical warranty
- For finish warranties please refer to our website
- **Door preparation:** 35mm
- **Backset:** 60mm
- **Door thickness:** 35mm to 45mm

REGENT SERIES
- 25 year mechanical warranty
- For finish warranties please refer to our website
- **Door preparation:** 54mm
- **Backset:** 60mm (70mm and 127mm options)
- **Door thickness:** 35mm to 50mm
- **Cylinder:** Schlage C5
- Ø65mm round rose
- ANSI/BHMA Grade 3 performance

ELEMENT SERIES
- 10 year mechanical warranty
- For finish warranties please refer to our website
- **Door preparation:** 54mm
- **Backset:** 60mm
- **Door thickness:** 35mm to 45mm
- **Cylinder:** Schlage C5
- Ø63mm round rose

SCHLAGE STELLA™ DESIGN FEATURES AND BENEFITS

TwinSecure®	Adds security through twin activating jaws / provides locking by snib or key
SlamStop®	Protects locking jaws from accidental damage / offers childproofing / prevents accidental lockout
ErgoDesign®	Suits left or right hand door applications / improves grip and feel of handle / favoured through rigorous consumer testing
MultiFix®	Adds security through adjustable concealed strike with stainless steel receiver plate and multiple fixing points / suits new and retrofit applications
MultiFunction®	Provides non key locking, key locking and dummy

TECHNICAL SPECIFICATIONS

Door thickness
- 30mm to 50mm

Cylinder options
- Standard C5 or C4 cylinders available

FUNCTIONS
- Deadlocking
- External locking
- Locking by snib only
- Dummy

WARRANTY
- 10 year mechanical warranty
- For finish warranties please refer to our website

Brio **Open Bar Rail 80**

TECHNICAL SPECIFICATIONS
- **Max door weight:** 80kg
- **Door thickness:** 35mm to 44mm
- **Max door width:** 1100mm
- **Rail colours:**
- Powder Coat Black
- Satin Stainless Steel
- Antique Bronze (matches closely to Aged Brushed Copper)

FEATURES
- Easy installation
- Precision bearing and nylon tyre rolls smoothly over a flat bar rail
- Standard kits include length of rail, door hangers, door stops and guide (single panel)
- Joining bracket available for bi-parting applications (two kits)
- Optional soft close accessory

WARRANTY
- 10 year mechanical warranty
- For finish warranties please refer to our website

Brio **Wardrobe Roll 50**

TECHNICAL SPECIFICATIONS
- **Max door weight:** 50kg per panel
- **Door thickness:** 30mm to 40mm
- **Trim height:** Panel height + 37mm
- **Track colours:** Pearl White, Clear Anodised and Black Anodised

FEATURES
- Superior quality running hardware
- Simple, clean look with whisper quiet operation
- Easy fix double or triple track
- Optional soft close accessory

WARRANTY
- 10 year mechanical warranty
- For finish warranties please refer to our website

Glossary and Guides

COMMON TERMS

Backset – the distance from the edge of the door to the centre of the hole for your lever or knob.

Concealed magnetic catch – magnets concealed in the jamb to hold the door shut. Usually used with a dummy trim in a wardrobe or cupboard application.

Cylinder – the cylindrical shaped mechanism housed within door locks that contains the tumbler and keyway, into which a key is inserted to operate the lock.

Deadbolt – a bolt engaged by turning a knob or key, rather than by spring action.

Door preparation – the cut-outs or holes made to the door for the lock and/or lever being installed.

Dummy / Dummy trim – A face fixing lever or knob that matches your passage and privacy sets, for a cupboard or wardrobe door. Usually sold as singles not pairs and does not come with a latch.

Escutcheon – a cap that covers the base of a key cylinder (not to be confused with Rose as below).

Jamb – the frame that surrounds the door in the doorway.

Latch – the mechanism that slides into the edge of the door and retracts or protrudes with the turn of the doorknob or lever. The latch keeps the door closed and allows it to open.

Mortice lock – a lock which is set within the body of a door in a recess or mortice, as opposed to one attached to the door surface.

Night latch / Rim lock – a lock that is fitted on the surface of a door. It is operated from the exterior side of the door by a key and from the interior side of the door by a turn or small knob.

Rose – a cap that covers the base of a door handle allowing concealed fixing screws.

Roller catch – has a spring-loaded roller held within a cylinder attached to a flange. The catch is recessed into the edge of the door while the striker plate is recessed into the jamb. Usually used with a dummy trim or pull handle.

Stile – the vertical edge of the door where door furniture is fixed. A thin stile i.e. one with a glass pane near the edge of the door may have implications for which backset can be used.

Strike / Strike plate – the metal piece attached to the door jamb. As the door closes, the latch mechanism strikes the plate mounted to the jamb and the strike plate catches the mechanism and holds the door closed.

Turn - a small interior piece that can be turned with your finger and thumb to lock or unlock a door lock.

KEYING SERVICES

C4 and C5 keyways – The Schlage "C" keyway key blank C5 (5 pin) is part of the Schlage keyway family and is the default keyway used in Schlage Residential locks. The classic "C" keyway provides security with no restrictions on key duplications.

The C4 (5-pin) keyway is useful when keying alike to existing locks that are not from Schlage, as it is a keyway used by other hardware brands.

Residential Construction Keying – RCK – system, involves a single key, replicated to be used by tradesmen for all homes during the construction phase. Building companies will be supplied 25 keys free (additional keys by negotiation), which can be reused on future houses/apartments. Each building company receives a personalised RCK system, so no two building companies have the same keys. When the new homeowner takes over the house, they are presented with their own keys, which, when used, automatically resets the lock cylinder, making the RCK inoperable and providing the homeowner final ownership and security.

Master keying – Master keying is a method of controlling access through a building. A key schedule is prepared from provided floor plans. It includes a key matrix, which locates keys and locks and their distribution and usability. Security is based on a system where one lock has its own key. This key will not operate any other locks in the property/building, however where all locks are in the same property/building the locks can be operated by the one master key.

Keyed Alike – KA – More than one lock being operated by the same key.

Keyed To Differ – KD – One lock is opened with a single key.

Standard master keying vs restricted – With a non-restricted key (standard / open key), keys can be duplicated by any standard key cutting personnel. However, the ability for someone to cut a master key without knowledge of the origin or ownership of the key, is a risk that should be considered.

With the restricted key, the key blanks are restricted to approved locksmiths only. Keys cannot be cut without authorisation, which allows enhanced security, total key control and accurate record keeping of keys cut to date. Record keeping is maintained on a database which is held by the locksmith.
