

SAFETY LANCETS

ITEMS 7112, 7114-7115, 7122, 7124-7125, 7134

Dynarex Safety Lancets are pre-loaded, sterile lancets designed for capillary blood sampling and blood sugar monitoring. The tri-beveled needle retracts for added safety, reducing needlestick risks. Available in multiple gauge sizes.

- Designed for effective capillary blood sampling, diagnostic testing, and sugar-level monitoring
- Stainless-steel tri-bevel tip provides optimal patient comfort
- Protective, automatic retracting sheath helps reduce risk of accidental needlesticks
- Lancet is pre-loaded and ready-to-use; no additional device required
- 7122, 7124, & 7125: Button mechanism allows for controlled needle depth
- 7112, 7114, 7115, & 7134: Pressure-activated design releases the safety lancet with gentle pressure
- Gamma-sterilized for optimal hygiene
- Color-coded by gauge size for easy identification
- Not made with natural rubber latex

SAFETY LANCETS
