CARE AND MAINTENANCE

Door Furniture

At twelve (12) monthly intervals, the fixing screws securing the furniture to the door, both surface fix and through fix, should be checked and tightened as required. Loose fitting furniture which fails will not be covered under warranty.

All door furniture should only be wiped clean with a soft damp cloth. In the case of Satin Stainless Steel or Satin Chrome Plate, a non-abrasive mild household detergent may be used to remove ingrained grime.

Locks & Latches

Care should be taken to ensure the internal components are kept free of dirt and woodchips during installation as this is the most common cause of malfunction and will not be covered under warranty. Tubular latches used in external situations should be lubricated by an aerosol lubricant at twelve (12) monthly intervals.

Note

For applications that are subject to high use/ abuse or in corrosive environments, additional preventative maintenance will be required at a minimum of three (3) monthly intervals.
