

SILICONE FOLEY CATHETERS

ITEMS 5074-5081, 5084-5086

Dynarex Silicone Foley Catheters are 2-way catheters designed to provide dependable drainage and improved patient comfort during long-term indwelling use. Made from clear silicone to allow easy visualization of urine flow, clots, and mucus, the catheters feature large, smooth eyes to support efficient drainage and reduce discomfort. The pliable shaft and firm tip help aid smooth insertion, while the silicone material is designed to minimize tissue irritation and reduce the risk of encrustation over time.

- 2-way silicone catheter designed for extended indwelling use
- Features large, smooth eyes for effective drainage and patient comfort
- Pliable shaft with firm tip supports ease of insertion
- Clear body allows easy visualization of urine flow, clots, and mucus
- Silicone construction helps reduce tissue irritation and encrustation during long-term use
- Sterile, not made with natural rubber latex
