## VISUAL EXPERIENCE

**VX62 LCR | VX66 LCR**

SOLD AS EACH

Sonance Visual Experience Series leverages four decades of speaker design and innovation success to inspire and reimagine speaker technology for the future. Our first loudspeaker to be engineered by an iterative combination of simulation and machine learning, the VX Series is expertly engineered for superior performance, finish, installation, and above all, experience.

## FLEX FRAME MOUNTING SYSTEM AND KEY FEATURES

Sonance Visual Experience Flex Frame Mounting System is a two-piece design that allows VX models the flexibility to install in one or two-stages. Leverage the Flex Frame two-stage process to maximize installation efficiency on large scale projects.

## FEATURES AND BENEFITS

**Two-Piece Flex Frame Mounting System:** Vastly improved single stage or two stage installation process.

**Brilliant White Micro Trim Grille:** Brighter, more consistent white shade. RAL standardized to better match ceilings and walls. Bezel size 50% smaller with knife-edge to minimize shadow lines.

**Optional Trimless Grille:** Same brilliant white color but in a modern, monolithic aesthetic with no bezel.

**Sinusoidal Textured Waveguide:** Achieve even, balanced tonality to better fill spaces with smooth, extended treble that is remarkably consistent at any angle.

**CDX Crossovers:** Adapted from Sonance Invisible Series, our Constant Directivity Crossovers align tweeters and woofers to provide consistent dispersion at all frequencies.

**Advanced Driver Motor Topology:** Engineered via sophisticated magnetic and physical simulations to reduce distortion to nearly inaudible levels, resulting in the highest fidelity drivers we have ever made.

**LCR Front Channel Staging:** VX LCR speakers are designed to deliver crisp detail, clarity, and vocal separation for superior audio support in TV and movie applications. Position them for Front Right/Left and Center channel configuration in 2 or 3 channel applications or full surround sound for the best in TV viewing.
