

NEW!

Double-Sided PaintPro®

DESCRIPTION

This tape is made of a combination of a double-sided tissue tape and our blue PaintPro® masking tape. The masking tape side (exposed side) provides a medium tack adhesive that removes cleanly after 14 days while the tissue side (liner side) provides a very tacky adhesive that sticks well to many types of surfaces.

MAIN FEATURES

- Differential adhesive system with two adhesive levels.
- The exposed side uses a painter's tape to be applied to walls or doors.
- The liner side uses a high-tack adhesive that is perfect for permanently holding plastic in place.
- Short term repositionable tape (exposed side).
- Withstands negative pressure.
- Strong and conformable.
- Rugged construction.

ADDED FEATURES

- 14-Day Clean Removal (masking tape/exposed side).
- Double the adhesion value (tissue/liner side).
- Hand tearable with an easy release liner.
- Thinner tape.

APPLICATIONS

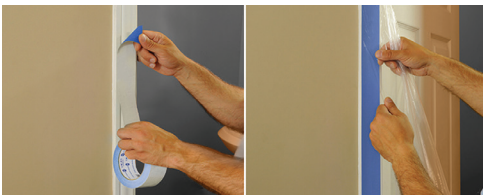

- Great for zipper-door enclosures or to seal off areas with plastic film.
- To hold polyethylene on delicate surfaces
