Care and use

Before using the ovenware for the first time, it is essential to hand-wash it thoroughly. This ovenware is suitable for domestic oven use only, withstanding temperatures of up to 220 °C (Gas Mark 7). To prevent sticking, lightly coat the inner surface with grease. For optimal longevity, it is advisable to use utensils made from silicone, wood, or nylon, while avoiding metal utensils. Overheating the ovenware is not recommended, and you should never leave it unattended while in use. In terms of cleaning and storage, always allow the ovenware to cool before cleaning, as it is not dishwasher safe. Instead, hand-wash it using a mild detergent and a non-abrasive sponge, then rinse and dry thoroughly. It is important to ensure that the ovenware is not stored while still wet. For your safety, always use heat-resistant oven gloves when handling the ovenware, and avoid exposing hot items to cold liquids. If you notice any signs of damage, please dispose of the ovenware carefully.
