

## Alternating Pressure Air Cushion

Item 10675

The DME Care Solutions Ever-Soft™ Alternating Pressure Air Cushion is a premium-grade cushion designed to help relieve pressure wounds and increase user comfort. The cushion features a system of interconnected air cells that inflate and deflate to help increase blood flow and redistribute body pressure and a digital pump that provides 3 comfort-level settings and adjustable cycle times. Ideal for use in homecare and long-term care settings.

- Four alternating horizontal air cells provide continuous pressure redistribution
- Compact digital pump with rechargeable battery provides up to 12 hours of continuous use
- Water-resistant pouch protects pump and mounts easily on wheelchairs for optimal mobility
- Weight Capacity: 300 lb.
- Adjustable straps hold cushion in place for reliable placement
- Low Battery and Low Pressure indicators help ensure proper functionality
- Convenient carrying case provides effortless portability
- Not made with natural rubber latex
- Warranty: 1 year
- 1 per box
