TECHNICAL SPECIFICATION

HEAVY DUTY FITTING BRUSHES

TECHNICAL SPECIFICATION: Oatey Heavy Duty Fitting Brushes are designed for cleaning the inside of copper fittings prior to soldering. Heavy Duty Fitting Brushes are made of high carbon steel bristles to ensure a long lasting, durable and sharp cutting surface. The contoured plastic handle provides a comfortable grip.

PHYSICAL/CHEMICAL PROPERTIES

Stem Galvanized Steel Wire
Handle High Impact Polystyrene/ + 20% Calcium Carbon filled Polystyrene
Brush High Carbon Steel Wire

DIRECTIONS FOR USE

Determine the appropriate brush size for the piping diameter. Insert the brush into the fitting socket and turn to remove oxides and other corrosion.

PRECAUTIONS

Read cautions and directions carefully before using this product. Bristles are sharp. Do not touch bristle portion of brush. KEEP OUT OF REACH OF CHILDREN.

COMMON APPLICATIONS

Oatey Heavy Duty Fitting Brushes are designed for cleaning, deburring and polishing the inside of copper fittings prior to soldering. Brushes can also be used to clean plastic and brass.

Consult Oatey Technical Department for applications not specifically referenced above.
