

## AIR-WATER SYRINGE TIPS

Dynarex Air-Water Syringe Tips are designed for compatibility with most air-water syringes and do not require an adapter, making them a convenient addition to dental practices. These disposable tips help support infection control by reducing air and water contamination during procedures. Each tip features a hands-free angled design for accurate placement and effective delivery of air and water during procedures.

- Designed to efficiently spray air and water during dental procedures
- Conveniently sized to fit most air/water syringes; no adapter required
- Hands-free angled tip gently rests in mouth for ideal placement
- Crafted from durable plastic materials for optimal reliability
- Air-Water Syringe Tips should not be autoclaved
- Ideal for various dental processes and procedures
