HIGH-VISIBILITY WORK GLOVES

The Hi-Viz Original® F6 is built for the long haul. At just 1.4mm thick, revolutionary AX Cutora™ palm material prevents cuts, punctures, and tearing with a single integrated construction of high-performance cut fabric and a touchscreen capable synthetic leather palm delivering EN 388 Level F and ANSI A6 cut resistance across the palm and fingers. Snag-reducing, single-panel mesh with Hi-Viz CoolPlus® woven construction wraps the back of the hand reducing heat buildup, while reflective printing provides eye-catching luminance. The Freedom-Flex stitched cuff reduces material bunching for free range of motion and a welded Lock Ring™ thumb panel and welded synthetic leather finger coverings boost durability and abrasion resistance without vulnerable stitching, and a lightweight TPR hook and loop closure locks in a secure, form-fitting fit.

FEATURES

1. New snag reducing mesh wraps the back of the hand with a single panel reducing additional seams.
2. Hi-Viz CoolPlus® woven-mesh back of hand reduces heat buildup while working.
3. Reflective ink provides eye-catching luminance.
4. Freedom-Flex stitched cuff design reduces material bunching on the back of the hand in encouraging free range of motion.
5. Welded Lock Ring™ grip thumb panel design wraps high wear thumb saddle area increasing durability and reducing vulnerable stitching.
6. 1.4mm AX Cutora™ palm provides EN 388: 2016 Level F and ANSI A6 cut resistance across the palm and fingers as well as touchscreen capability.
7. Welded synthetic leather finger coverings provide abrasion resistance and improved comfort.
8. Light-weight thermoplastic resin (TPR) hook and loop closure creates a form-fitting and secure fit.
