# Instructions

**NOTE:** The instructions provided are general guidance in the use of the combo lint brush set. They may not apply to your particular combo unit. Always consult and follow the cleaning instructions provided by the manufacturer of your combo unit when using this product. Damage may result from failure to follow your manufacturer's instructions.

- 1. Prior to Use:** Remove the lint filter and clean the filter screen in accordance with the instructions in your combo unit's Use & Care manual.
- 2. Connect a Brush:** Twist desired brush onto handle.
- 3. Use:** With the lint filter removed, use the brushes to clean the lint filter area and the condenser fins. Use a gentle twisting motion in corners, taking care not to twist the brush in a way that releases the brush from the handle.

#### CAUTION

Avoid forceful contact when cleaning the condenser fins. Damaging the fins can affect the unit's performance.

- 4. Run a Dryer-Only Cycle:** Replace the lint filter and run a dryer-only cycle for 5 minutes. This should collect any lint loosened by the cleaning process. After the cycle is complete, remove the lint filter and discard any gathered lint.
- 5. Store:** It is normal for lint to be wet. Before storing, remove any residual lint from the brushes as desired.
