

Try mixing clay to create new colors:

pink + yellow = orange

blue + yellow = green

Make Sweet Treats

* Rainbow Taffy

Roll thin ropes of each color. Create orange and green following the chart above. Use the clay tools to press the ropes together just enough so they stick to each other.

* Lollipops

Roll a thin rope of clay (any color) and a thin rope of white clay. Twist them together, then roll into a coil.

* Cupcakes

To make the cupcake base, roll a ball then flatten the top and bottom.

To make the icing, marble two colors together then roll it into a thin rope. Coil this onto the cupcake base. Press the layers together and onto the base.

Make a tiny ball and press it on top like a cherry.

Make Your Own

Water Globes

Sweet Treats

Note: You will need to divide up your supplies so you have enough materials to make all 3 water globes.

For best results, plan out your designs before you begin. Refer to the box for ideas and inspiration.

* Craft with care. Keep glitter away from your eyes, nose and mouth. Rinse with water as needed. *

Place the base on your work station with the shallow side facing up. This is the side you will decorate. Do not decorate the side with the removable stopper.

1. Completely cover the base with a thin layer of clay. Push the clay evenly to the edge. Even small open areas around the edge could create a leak.

2. Flip the base over and remove the stopper. Using the pointed clay tool, clear the clay away from the hole and replace the stopper. Do not place clay over the hole when decorating. This is where the water will be added later.

3. Decorate your scene by making clay gumballs, confetti, rainbow taffy, lollipops, cupcakes- anything you can imagine! Be sure to press them to the base clay to keep them in place.

Refer to the back page to learn how to create these fun shapes and how to mix colors

4. Place clay on the bottom of figurines to stick them to the base clay. Press the clay on the figurine into the base clay to keep it in place. For permanent placement, add a drop of glue to the bottom of the figurines and stick them to the base. Allow to dry 1-2 hours.

5. When dry, turn the base over and give it a firm shake to make sure everything is secure.

Note: You may need to wash your hands when switching colors of clay.

**** Pro tip-** to keep the glitter from sticking to the inside of the globe, try smearing a *tiny* amount of dish soap around the inside of the globe before the next step.

6. Sprinkle the round glitter over your scene to make it look like it's coated in sugar! Add the confetti glitter next so it can float around your sugary scene. Try to keep the glitter away from the edges for the most secure seal.

7. Press the top of the globe onto the base. It should fit very snugly. You may need to ask an adult or older friend to help with this step.

8. Wipe away any clay from the outer edge, where the globe meets the base. Add a line of glue around the seam. Place the water globe on the clear plastic tray and let dry for 1-2 hours.

**** It is best to work over a sink and ask an adult for help as needed. Have some paper towels handy to clean up any drips.**

9. Remove the stopper from the bottom of the base and place the funnel in the hole. Use a small stream of cool water to fill the base. Once it is filled, replace the stopper. For a crystal clear snow globe, try using bottled or distilled water.

10. Watch your sweet treats scenes sparkle! Hold the base and globe together while shaking.

11. Add your Creativity For Kids sticker to the bottom of the base.

Display - place your water globes on the clear plastic trays provided in case of accidental leakage. Do not display your globes directly on wood or any surface that may be damaged by water. These globes also look great without the water!

As with any handcrafted item, your snow globes may change over time. This is a normal part of the crafting process.
