

FLUID + SOLIDIFIER

Dynarex Fluid Solidifiers are designed to quickly encapsulate and solidify liquid medical waste to promote optimal safety and reduce the risk of cross-contamination. The highly absorbent, chlorine-free powder is formulated to turn spills into a gel-like substance, simplifying the cleanup and disposal of potentially harmful bodily fluids. The Solidifier comes in convenient 10 g or 28 g pouches for easy portability and storage.

1284 28 g Packet 200 pkts / cs

1285 10 g Packet 200 pkts / cs
