

# Invacare® Solara™ 3G - Adult Tilt-in-Space Wheelchair

## Thank you for using Invacare eForms.

Invacare is pleased to offer you an upgraded solution to your ordering process. Our enhanced order forms allow you to fill out a form electronically, print and fax the form, save and email\* it to Customer Service, or maintain the business practices that work for you today. The format has been revised to reveal a cleaner look with electronic selection and input functions.

For additional information please visit [www.invacare.com/eForms](http://www.invacare.com/eForms)

## Adobe Acrobat Reader DC

\* Interactive functions of our new forms work best with the latest version of Adobe Acrobat Reader DC visit <https://get.adobe.com/reader/> to download and install on your PC or Mac or visit Google Play/ iTunes to download the Adobe Acrobat Reader DC app for your device.

### Save

---

Adobe Acrobat Reader DC allows you to save this form with your content - to complete later or use as a starting point for your next form.

Please note that content must be added and saved in Acrobat - saving content from completed forms in the browser may not be possible.

### Submit

---

Adobe Acrobat Reader DC allows you to submit this form electronically via your email client.

Simply click the submit button below and step through the simple process.

### Print

---

If you do not have access to Adobe Acrobat Reader DC simply print this form and complete it by hand and fax it to our Customer Service Department at:

**800-678-4682**

SPACK Suspension Package .....\$1,599.00 E1015

Not available with HDPG, LOSHEAR, LOSHEARWO, RCANE, FLDBACK.  
Includes DROCK and FLSF.

### Transport Tie Down

TRBKTS includes four factory-installed wheelchair transport brackets. TRBKTS has not been crash tested in accordance with WC19. Use these transport brackets only to secure an unoccupied wheelchair during transport.

As of this date, the Department of Transportation has not approved any tiedown systems for transportation of a user while in a wheelchair, in a moving vehicle of any type. It is Invacare's position that users of wheelchairs should be transferred into appropriate seating in vehicles for transportation and use be made of the restraints made available by the auto industry. Invacare cannot and does not recommend any wheelchair transportation systems.

## TRANSPORT/VENT TRAY SELECTION

### TRANSPORT TIE DOWN

TRBKTS Transport Brackets ..... \$331.00 K0108

Not available with AVENT, BACKVENT, P750, 2218. Now available as a service part kit for existing models.

Standard on one side and offset on the opposite side

### Tilt Assist Explained

The Solara® 3G wheelchair is shipped from the factory pre-configured with one of three "Tilt Assist" settings: Front, Mid or Rear, based solely on the seat depth range and seat depth ordered. This setting describes how the user's weight is distributed on the frame itself, i.e., does one front load the chair, rear load or is the weight evenly distributed. As compared to the 2G, the 3G requires up to 30% less force needed to tilt because of these settings. If factors other than seat depth or seat depth range come into play that affect the weight distribution of the chair, the provider has the ability to change the Tilt Assist setting in the field by simply adjusting 2 screws on each side of the frame.

| Tilt Assist Factory Setting |                            |                            |
|-----------------------------|----------------------------|----------------------------|
|                             | Seat Depth Range 15" - 19" | Seat Depth Range 18" - 22" |
| D15                         | Front Setting              |                            |
| D16                         | Front Setting              |                            |
| D17                         | Mid Setting                |                            |
| D18                         | Rear Setting               | Front Setting              |
| D19                         | Rear Setting               | Front Setting              |
| D20                         |                            | Mid Setting                |
| D21                         |                            | Rear Setting               |
| D22                         |                            | Rear Setting               |

The factory setting may need to be adjusted if a seating system is added. The factory setting does not account for conditions outside of the seat depth and seat depth range which may cause more weight to be distributed to the front or back of the chair.

When adjusting the Tilt Assist there are 4 bolts to change (2 on each side.) See the illustration to the left and chart above.

The Rear setting has the rocker tube telescoped entirely into the seat frame support tube where the adjustment bolt is in the bottom hole. Along the base frame the bolt is in the top hole. (e.g. accommodates a seat depth that is in the highest end of the seat depth range)

For the Mid setting the adjustment bolt is simply in the middle hole along the rocker tube which telescopes out and the middle hole along the base frame. (e.g. optimal for a seat depth in the middle of the seat depth range)

The Front setting has the bolt in the top hole of the rocker tube which is fully telescoped out of the seat frame support tube and in the bottom hole along the base frame. (e.g. accommodates a seat depth in the lowest end of the seat depth range)
