EMB II SERIES

EM8-DF | EM10-DF | EM12-DF | EM15-DF

SOLD AS EACH

One of many available options in the EMB II Series Subwoofer features a down-firing cabinet design. Built from solid aircraft grade aluminum and expertly finished to your color preference. The EMB-DF utilizes our “Energy Multiplying Bandpass” technology to obtain high output and low distortion from a compact enclosure. Inside, the cabinet features a specially designed woofer and a pneumatically phase coupled passive radiator, both with aluminum cones and rubber surrounds.

KEY FEATURES

The EMB12-DF subwoofer has been tuned to perform all the way down to an impressive 18Hz. We recommend pairing it with the M1000 Class D Amplifier which provides 1000 watts of clean power and features a full DSP digital processor. You can power a total of one EMB-DF Subwoofer with a single M1000 Amplifier. For outdoor and marine applications, order the EMBXX-M which features a tough exterior powder coat for harsher environments.

FEATURES AND BENEFITS

- Sturdy aluminum cabinet design
- Available as marine grade (Down Firing models only)
- IP65 Rating
- Can be ordered in low impedance or 70V
- Passive subwoofer (requires amplification)
- TAA Compliant
- Custom colors are available, contact JAMES for details
