TABLE TENNIS CONVERSION TOP

MODEL T814
FOR POOL TABLES

INSTALLATION AND REPAIR PARTS

1. Remove tennis conversion top from carton, and place upside down with the two halves of top butted together.
2. Cut sponge rubber strip into 12 equal lengths. Length of each strip will be approximately 4½".
3. Measure the size of your billard table to determine the correct placement of the twelve protective sponge rubber strips (#2) as shown in Figure 1.
4. Peel paper backing from each strip and apply to **bottom** surface of your conversion top. These strips protect the finish of your pool table rails or surface that the conversion top rests on.
5. Now set one half top on the pool table and check for correct placement. After correct placement is complete set other half top in place.
6. Install net brackets and net. (Not furnished with this top).

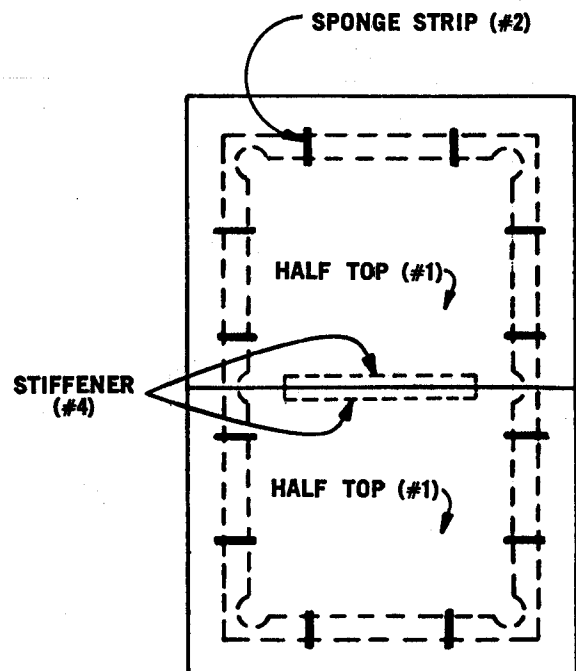

FIGURE 1

MAINTENANCE

We do not recommend the use of wax on the top as it would tend to make the table surface too shiny.

For cleaning purposes use a small amount of mild detergent mixed with warm water. Apply with a damp cloth, then wipe thoroughly. **Do not soak conversion top.**

NOTE:

Changing weather conditions may cause slight warpage in the playing surface of this table. This will not affect playing conditions. Playing surface will return to original condition when weather conditions stabilize.

STORAGE:

This table should be stored indoors.
