

ST21-4 SUBTERRANEAN SERIES

21" SUBTERRANEAN SUBWOOFER

(1) 21" Internal Active Woofer

The ST21-4, a 21" subterranean subwoofer was developed for high SPL bass output outdoor applications. It features a powerful 21" transducer for maximum excursion and SPL. The ST21-4 can be directly driven by an M1000 subwoofer amp which produces 70V of output, or 1000W+ at the 4ohm rating. However, at 1000W, wire loss needs to be considered and calculated as with any other 4 ohm wire run. In all applications, the ST21-4 should be bi-amped.

Also, the ST21-4 is quite heavy. Four eyebolts are located on the top to allow the subwoofer to be lowered into the ground.

Size	24 h x 24 w x 24 d (in) 610 h x 610 w x 610 d (mm)
Freq Response	18-120Hz±3dB
Impedance	4 ohms
Sensitivity	91dB 2.83V /1m
Power req.	500 - 1000 watts
Woofer	(1) 21" (534mm) Aluminum
Enclosure	Aluminum
