

A comfortable ergonomic viewing position for dual computer monitors is essential for preventing eye and neck strain. LiftTEC® Arms move smoothly and stay in place with one-handed operation, providing easy adjustments for a perfect personal fit.

The LiftTEC® Comfort Duo provides freedom of movement and positioning for two individual monitors, each weighing up to 17.5 lbs. The set includes two LiftTEC® Arms I and a 17.52" TSS column. The column uses a drilling screw for added stability and fits desktops with a thickness of .197" to 2.97".

Each Arm I is equipped with a Quick Release monitor mount – simply click the monitor in place and tilt to the perfect viewing angle. Gas Spring technology makes the arms easy to move and keeps them in place. Each arm has a range of 21.54". Further height adjustments can be made along the TSS column.

Cable clips are included to maintain a neat, organized appearance.

LiftTEC® arms have a clean, modern style to suit any work environment.

Item Number	Base Option	Capacity	Range
220+0150+000	Drilling Screw	17.5 lbs ea	21.54"
