### **Care and use**

Before first use, ensure to hand-wash the ovenware and dry it thoroughly. This product is suitable for use in a domestic oven only, with a maximum temperature of 220 °C (Gas mark 7), and must not be used on a hob, in a microwave, under a grill, or exposed to naked flames, open fires, or barbecues. For best results, only heat-resistant plastic, silicone, or wooden utensils should be used, avoiding metal ones to prevent damage. It is important not to cut food directly in the ovenware as this may harm the surface. Excessive heating and sudden temperature changes should be avoided, and the ovenware should never be left unattended during use in a well-ventilated kitchen. After cooking, allow the ovenware to cool completely before cleaning, as it is not dishwasher safe. To clean, utilise warm, soapy water and a mild detergent with a soft cloth, steering clear of harsh or abrasive cleaners; stubborn stains can be addressed with a non-abrasive plastic mesh or pad. It is advised not to soak the ovenware for extended periods and to ensure it is stored dry. Always handle hot ovenware with heat-resistant gloves and take care when moving it in and out of the oven, ceasing use immediately if any damage or defects occur.
